**Federally Funded Programs
Administered by the
Ohio Department
of Education**

Fiscal Years 1975-1976

Federal assistance for educational programming is becoming increasingly complex. One reason is that each Congress enacts new laws and amends or combines titles of existing laws. Another reason is that application and implementation procedures vary considerably from law to law and, in many instances, from title to title within the same law.

To assist the school districts of Ohio in more effective use of federal resources, the Division of Federal Assistance has prepared this handbook containing concise profiles of the federally funded programs currently administered by the Ohio Department of Education. (Programs administered by other state agencies or by the U.S. Office of Education are not included.)

For more detailed information about a specific program, school and project officials should refer to guidelines or other information furnished by the administering division or section of the Ohio Department of Education. If guidelines are unavailable or out-of-date, contact the office indicated on the profile sheet.

In addition to program overviews, this publication includes a five-year fiscal summary of federal support for federally funded educational programs administered by the Ohio Department of Education.

Profiles written from a national perspective appear in the **Federal Catalog of Domestic Assistance**. For the convenience of interested persons, program numbers used in the federal catalog are included in each Ohio profile.
